

## **Waste Heat Recovery**

- ◆ Recover heat from flue gas, engine cooling water, engine exhaust, low pressure waste steam, drying oven exhaust, boiler blowdown, etc.
- ◆ Recover heat from incinerator off-gas.
- ◆ Use waste heat for fuel oil heating, boiler feedwater heating, outside air heating, etc.
- ◆ Use chiller waste heat to preheat hot water.
- ◆ Use heat pumps.
- ◆ Use absorption refrigeration.
- ◆ Use thermal wheels, run-around systems, heat pipe systems, and air-to-air exchangers.
